

***Current and predicted weather conditions must be seriously considered as well as wind direction prior to undertaking this activity.***

- 1 Schedule 9 permits must be obtained prior to the use of any grain dryer, and all **prescribed conditions** contained on that permit must be complied with.  
**Note:**  
***a) Provision of Rural Addresses (to be provided of where the Grain Dryer is to be operated), when application for a permit is made. Notification to Council will only be required the first time the dryer is operated, at each rural address. If there isn't a rural address available, revert to section number, hundred and road name.***
- 2 Issuing of permits for the use of grain dryers commences from the start of the Fire Danger Season of any year.
- 3 If the lighting of grain dryers is required on a **Total Fire Ban** day and days when the predicted **Fire Danger Index** published by the Bureau of Meteorology at 8am exceeds a rating of **35, a Schedule 10 permit must be obtained**. If you do not have access to this information please contact Council's Fire Prevention Officer on 0429 882 070 or CFS Region 6 Port Lincoln (08) 8682 4266.
- 4 The issue of permits for grain dryers exempts the conditions of the Fire & Emergency Services Regulations 2005, Section 33(5) (a), (c), (d).
- 5 A minimum of 400 litres of water connected to a working firefighting pump and hoses must be kept at hand in the paddock area where the drying is to be conducted.

**Note:**

*Any permit issued may be revoked at any time by an Authorised Officer if conditions are considered too dangerous for burning off operations or if permit conditions have been breached. Breach of the prescribed or local conditions may face prosecution or issued with an expiation notice.*

*The holder of the permit has the overall responsibility to ensure that all conditions are met, and that all reasonable care is taken to prevent the escape of fire.*
